1 General

1.1 Purpose

This document describes the new functionality that has been developed for DynaRent for D365 Sales, which is based on Microsoft Dynamics 365 Sales.

It also elaborates on the known issues for this release and it provides information about the underlying structure of the application.

This document is primarily meant for product- and implementation consultants familiar with the concepts of DynaRent and DynaRent for D365 Sales.

This document explains the content of the delivery package to consultants of To-Increase partners.

1.2 Compatibility

In some cases, an update of the DynaRent for D365 Sales requires an update of the DynaRent version of the linked Microsoft Dynamics 365 Finance and Operations instance in order to be fully compatible. The following table lists such dependencies.

Release DynaRent for D365 Sales	Minimum required DynaRent version	Minimum required D365 F&O version
10.0.24.40	10.0.24.40	10.0.24

The DynaRent for D365 Sales continues to work on older versions and can be implemented on older DynaRent versions, however this will not support the full capabilities of DynaRent for D365 Sales.

1.3 Setting focus areas

Below mentioned setup needs attention.

1.3.1 Sales and marketing parameters

During implementation the Sales and marketing parameters opportunities should be never set as "Prompt" as this will cause an error in relation with DynaRent for D365 Sales.

When set to "Prompt" the following error will occur: "Write failed for entity CDS sales quotation header with unknown exception - BOX API can't be used from non-interactive sessions."

1.4 Deliverables

With this release we deliver the following:

1. Release Notes DynaRent for D365 Sales 10.0.24.40 (March 2022)
2. DynaRent for D365 Sales_Deployer_10.0.24.40.zip file
3. DynaRent for D365 Sales Installation Guide 10.0.24.40

2 Functionality

This chapter briefly touches upon any core features for DynaRent for D365 Sales.

Further details can be found on To-Increase F&O Docs (to-increase.com) shipped along with this release.

This chapter also describes any discontinued features and the reasoning behind the discontinuation.

NOTE: At the time of writing these release notes, our Online Help regarding the DynaRent for D365 Sales was still Work In Progress, our site To-Increase F&O Docs (to-increase.com) will be updated with the relevant information as soon as possible.

Microsoft is continuously adding new features in the application directly and via Feature Management. Sometimes these are public preview and will be made generally available in future releases, in other cases, they are already general available, and you have the choice to activate them.

Currently, we are not testing compatibility with all new features or combinations.

Once a feature is enabled at the customer environment and in case of any issues or questions related to new standard features and our solutions, kindly contact us via To-Increase support.

2.1 Core Functionality
